

## Languages and Technologies

---

- Javascript; Typescript; React 18; NodeJS; Express 4; MongoDB; Mongoose; PostgreSQL; Firebase; AWS Lambda; AWS CloudFront; AWS API gateway; HTML; CSS; Tailwindcss; Git; GitHub; GitHub Actions; DynamoDB; Mocha; Chai; Supertest

## Projects

---

### PolishByCin: <https://www.polishbycin.com>

- Deployed full stack web-application for booking appointments for a beauty service (nail services) 2024
- Developed with typescript (ReactJS, ExpressJS), PostgreSQL, and Tailwindcss
- API developed using RESTful architecture
- Optimized email notification feature resulting in 50% decrease in notification delivery time
- Increased performance for photo gallery by caching response and reducing calls to Instagram API
- Developed with focus on different user experiences
- <https://github.com/ryanpv/beauty-service-app> 2023

### WorldAnime: <https://mal-simplified.web.app/>

- Deployed full stack web-app that showcases information for anime titles, including their trailers
- Developed with ReactJS, Express, Firebase, and Cloud Firestore database
- Deployed with Firebase Hosting and Firebase Functions with Continuous Integration/Continuous Delivery (CI/CD) pipeline through GitHub Actions
- Optimized for scalability with CRUD operations through data caching and pagination
- <https://github.com/ryanpv/mal-simp-api> / <https://github.com/ryanpv/mal-simp> 2023

### Video Streaming Server:

- <https://github.com/ryanpv/node-video-streamer> / **BLOG:** <https://ryanvoong.dev/#/blogs/expressjs-video-streaming-server-with-aws>
- Express server that securely streams videos through AWS CloudFront signed URLs
- Optimized performance by converting media to use HLS (HTTP Live Streaming) protocol to stream video content
- Optimized performance and scalability by using CloudFront CDN and edge-optimized API gateway
- Developed with AWS services: CloudFront, API gateway, Lambda

### Reddit Bookmark Manager:

2022-2023

- <https://github.com/ryanpv/reddit-bookmark-manager-client> / <https://github.com/ryanpv/reddit-bm-api>
- Full stack web-app developed with ReactJS and Express that allows users to sync Reddit their reddit account and organize saved posts in custom categories
- Improved performance by implementing pagination for fetched data from Reddit API and MongoDB

## Additional Experience

---

- Nursing leadership – Redesigned clinic flow plan for mass vaccination clinic to increase clinic performance by 10-15% as well as client and staff satisfaction 2016-Current
- Provided training and mentorship to registered nurses in an acute care setting
